Skills and Certifications

- Malware hunting utilizing in-house databases, tools and technologies to assist in identifying new malware trends and patterns from meta-data, behaviors and statistics
- Creating SQL queries with wildcards to create rules to identify malware
- Good understanding of windows operating system
- Javascript, Actionscript, C and C++
- A+ certified

Work Experience

Webroot Inc.

Senior Threat Researcher Analyst

09/2015 - Current

I was seeking a career in cybersecurity, and found Webroot. Started as a Front Line Engineer and worked my way up to Advanced Malware Removal then into Threat Research.

- Determining malicious and good files with SIEM and signature data.
- Creating custom rules to determine future files with signatures and wildcards
- Keeping up to date on the latest malware trends to answer and research various malware
- First-hand knowledge of how adversaries operate and their tactics, techniques, and procedures
- Training new threat analysis researchers on finding and analyzing malware.
- Performed hands-on analysis of live attackers with endpoint and network artifacts while in Advanced Malware Removal.

Threat Research

08/2015 - 09/2015

Front Line Engineer/Advanced Malware Removal

03/2014 - 09/2015

Ripstop Repair

Sewing Repair Specialist

11/11 - 03/2014

- Repair clothes and gear for Patagonia, Golite, Rab, Firstdrop and Flylow
- Repair backpacks for Mountain Smith, Golite, Patagonia, and Lowe Alpine
